Projects

Video Hosting Platform | *HTML, CSS, Javascript, React.js, Node.js, MongoDB, ExpressJs* [Site Github](#) **July 2024- August 2024**

- Built the backend for a video-sharing platform inspired by YouTube, handling core functionalities like user registration, authentication, video upload, and interactions.
- Implemented secure login and signup flows using JWT for authentication and bcrypt for password hashing, ensuring safe and scalable user management.
- Designed RESTful APIs using Express.js to support features like liking/disliking videos, subscribing to channels, commenting, and managing user profiles.

Achievement

- Leetcode: Maximum Rating - **1924 (Knight)**. Top **4.02** percentile among 480,000 participants. [Profile](#)
- GFG: [Profile](#)

Leadership / Extracurricular

Adhyaay (Techno-Cultural College festival) | *Web Developer*

May 2022

- Designed and oversaw the HBTU cultural fest's official website, showcasing event details, schedules, and highlights. Worked closely with the fest organizing team, maintaining a constant uptime and regularly updating the site.

Certifications

- Full Stack Web Development Program — [edureka](#)
